

Your Name _____

Record the Fungus You've Seen

What is the **name** of the fungus you saw?

If you don't know the name, can you think of what a good name for it would be?

When did you see the fungus?

The date is an important part of a scientific record (the information needed by scientists.)

Where did you see it?

At school? In your backyard? In bush? At a park? Near a river or lake? By the beach? Try to be specific.

How did it **look**?

What colour was it? What shape? What size? Did it have gills, pores, or neither?

What was it **growing on**?
A living tree? Dead leaves? A log? In the ground?

Knowing what it grows on can tell you what it uses for food. Different fungi feed on different things.

Can you **draw** the fungus you saw?

You can send your record to:

Fungimap Inc., c/o Royal Botanic Gardens Melbourne, Private Bag 2000, South Yarra, VIC 3141
